*‘in unknown territory
look for a compass not a map’*

Define

Systems resilience

Community resilience

Disaster resilience

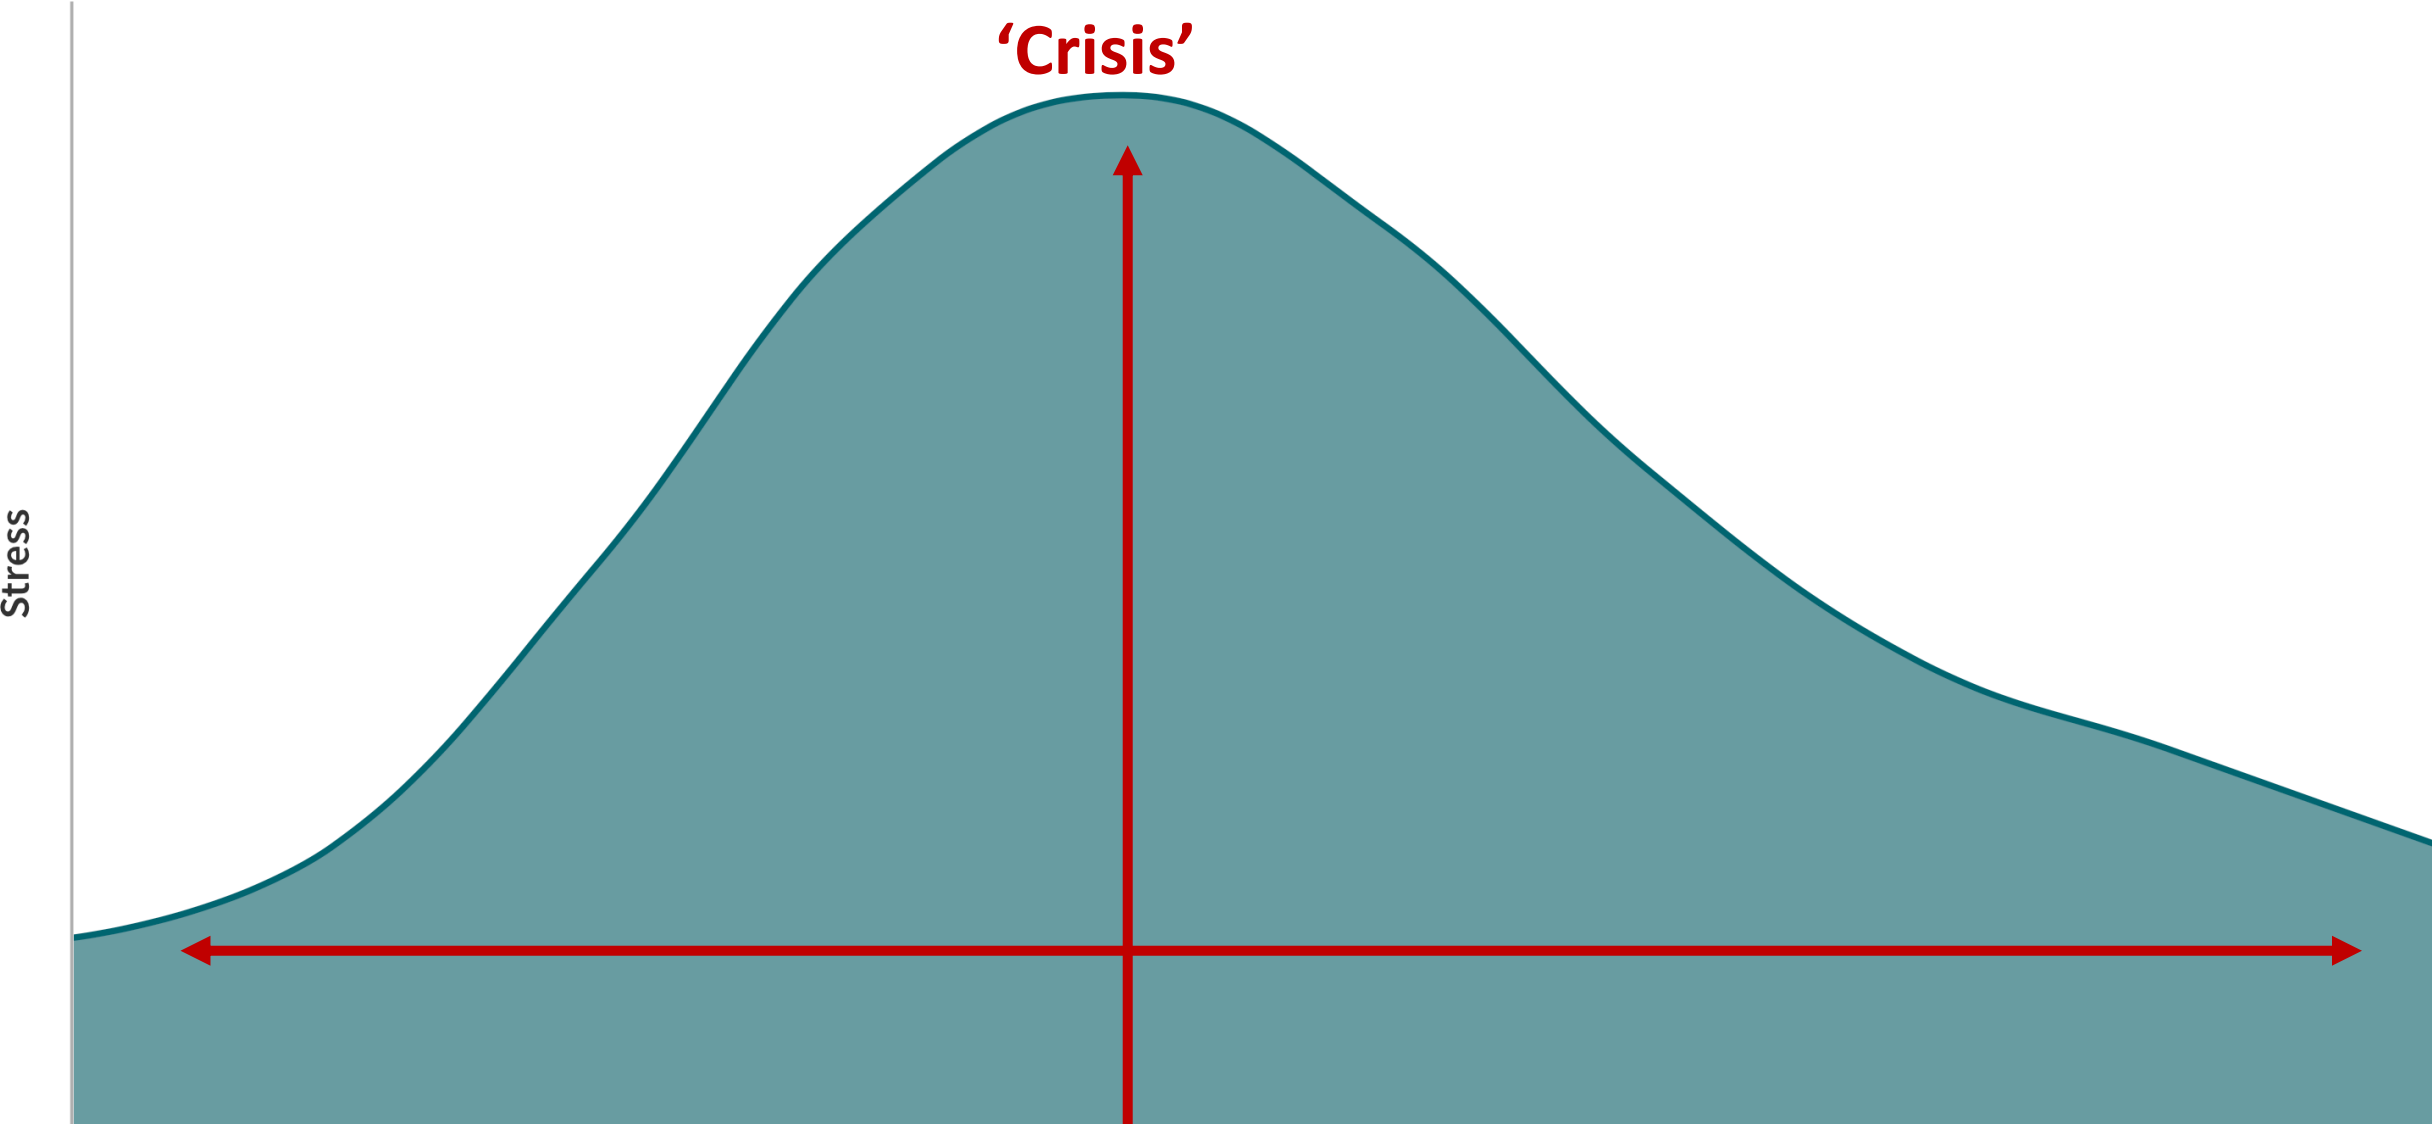

**Resilience of what?
Resilience to what?**

Psychological resilience

Personal resilience

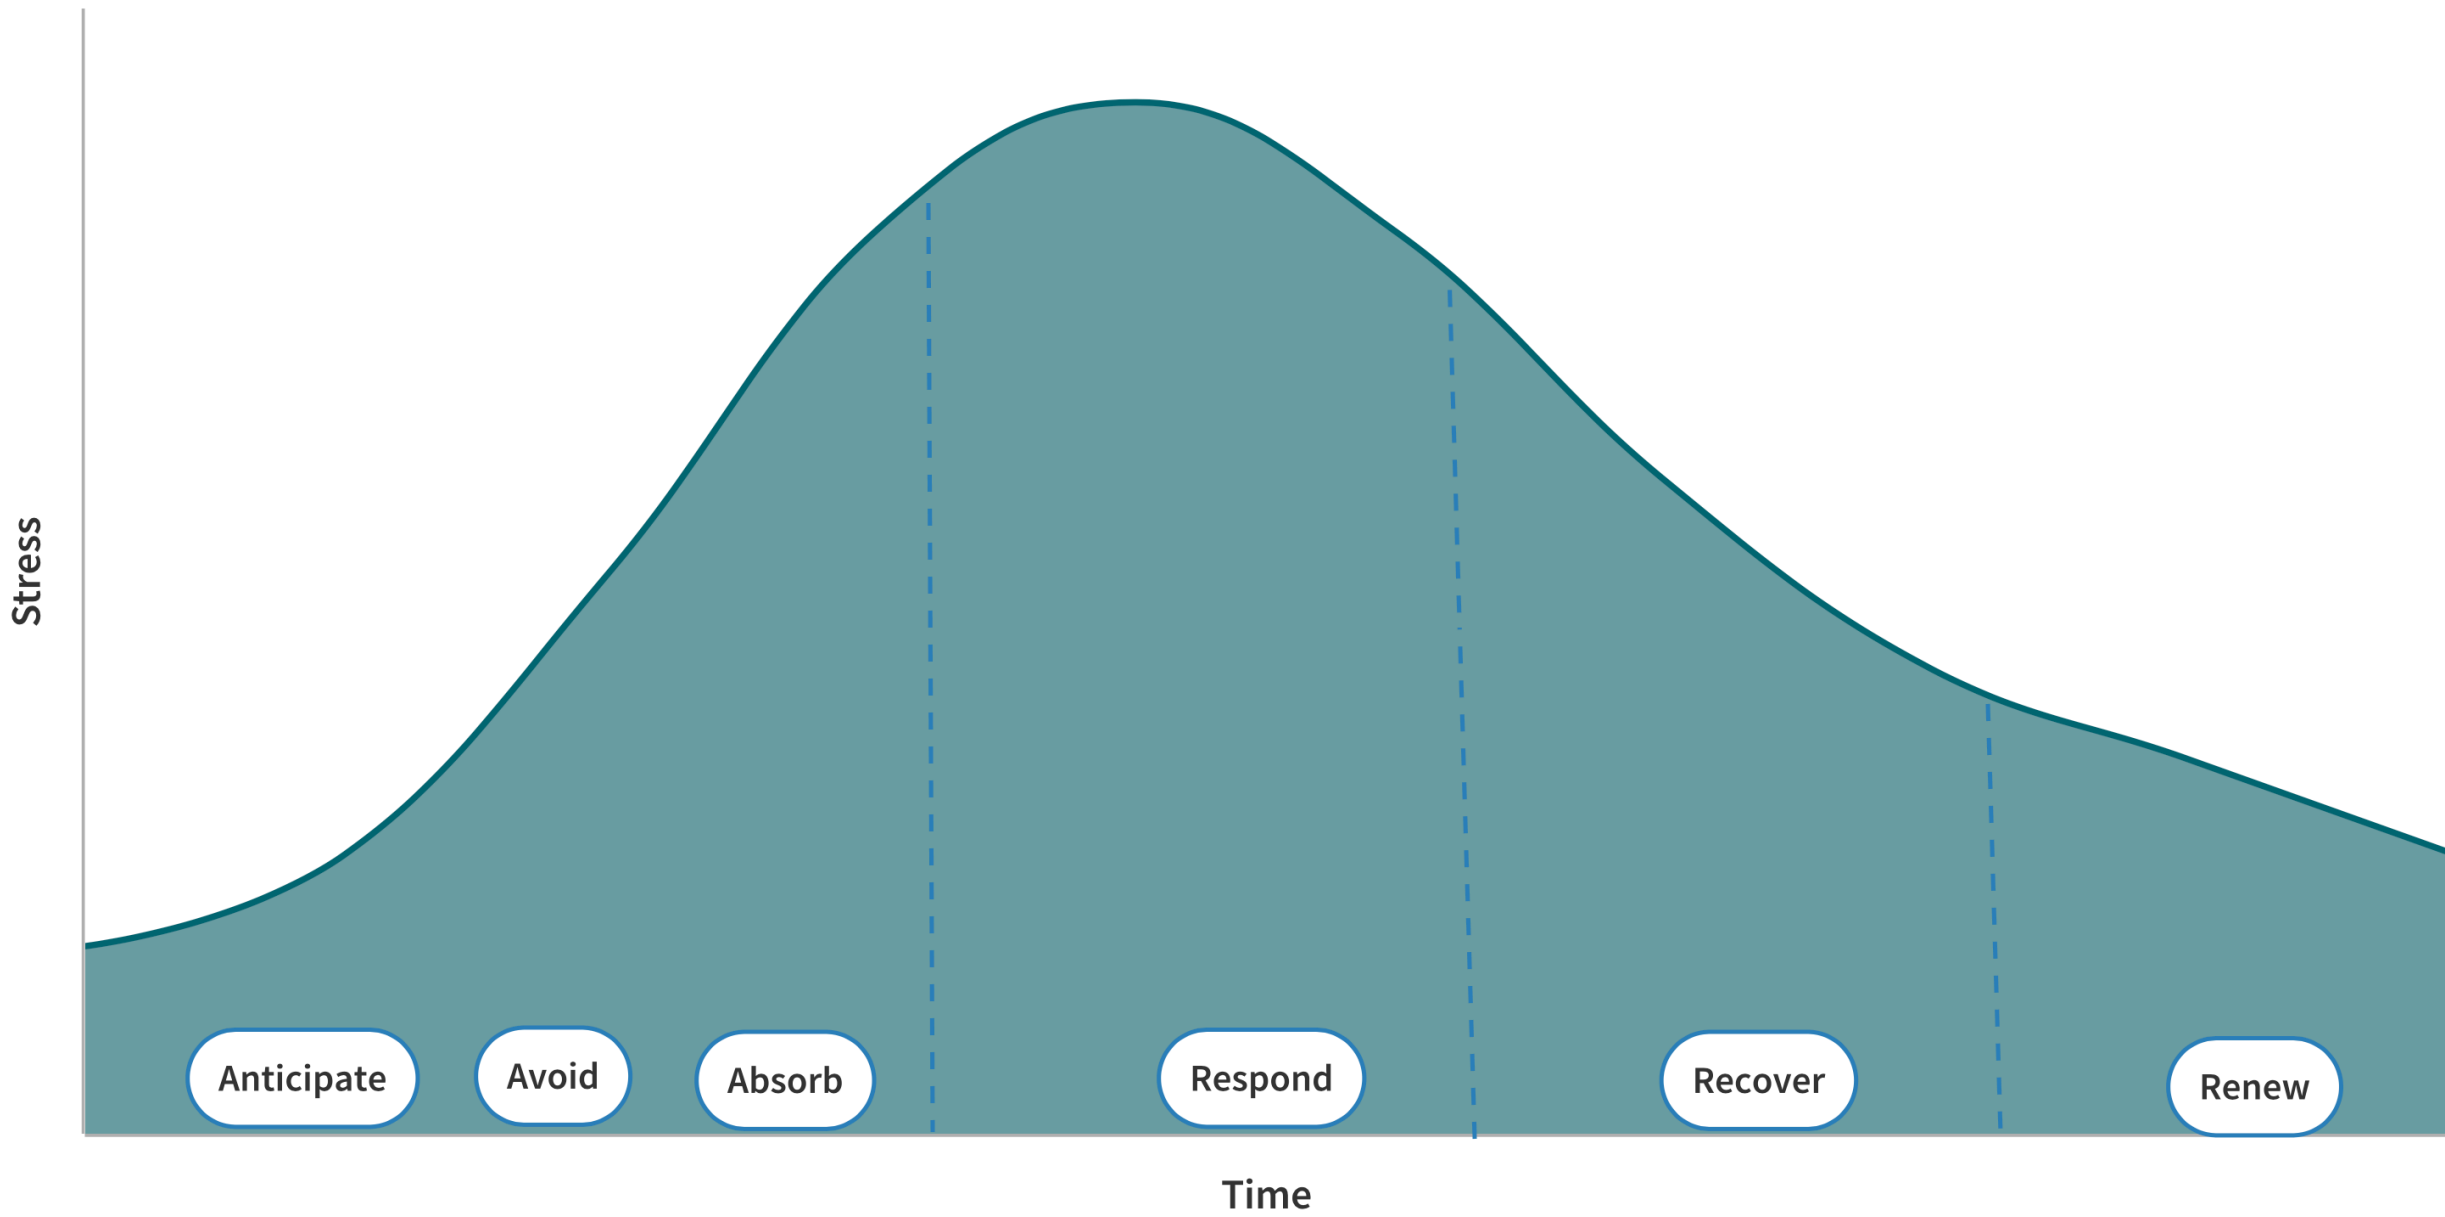

Orientate

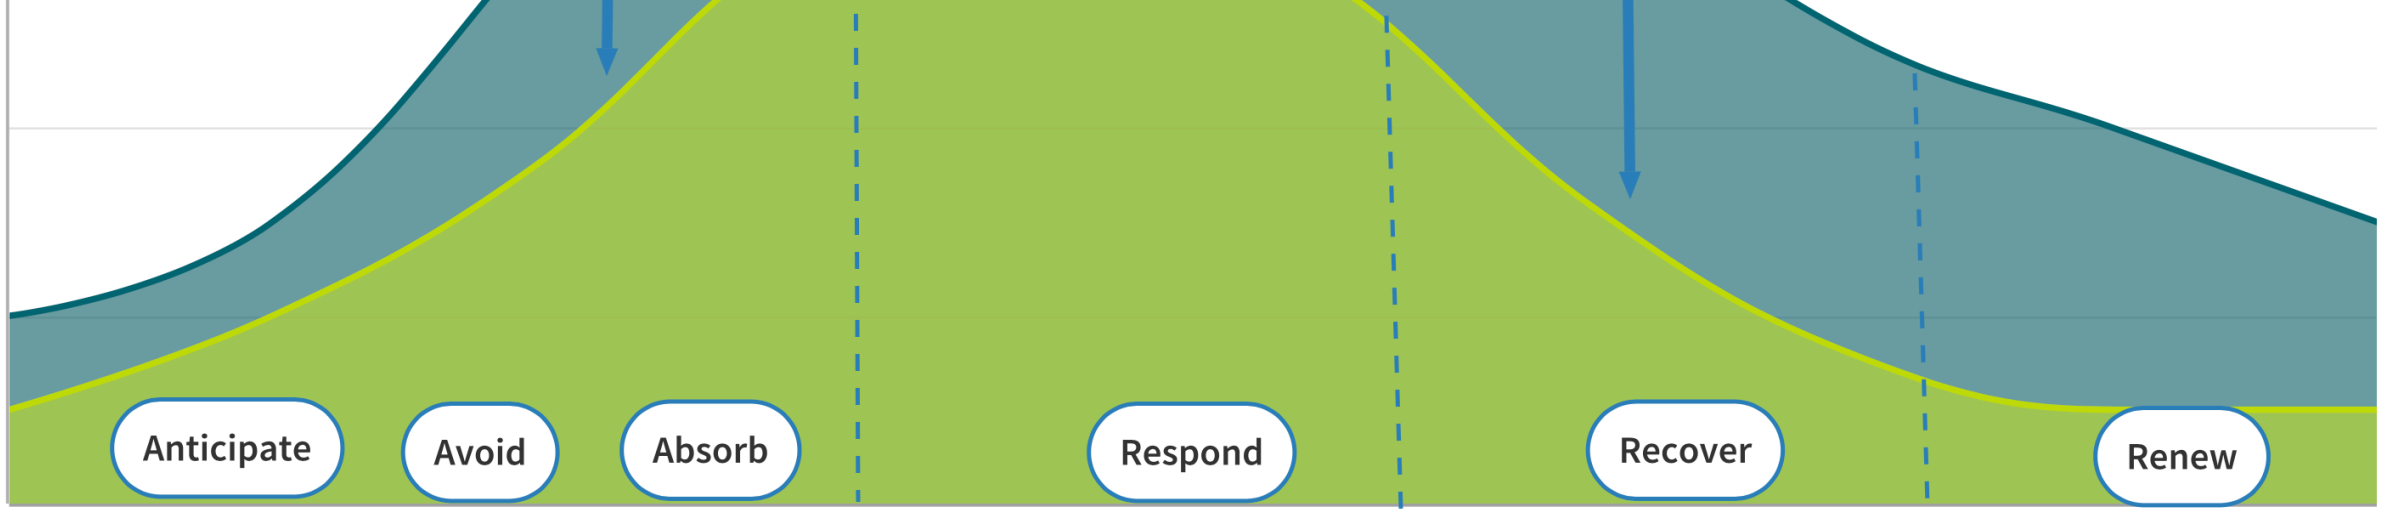

'Crisis'

Stress

Time

Psychological		Evacuation planning		Crisis services	Counselling	Reflection
Personal	Vulnerable people identified	Training	Insurance		Insurance	
Community	Community awareness building	Scenario planning	Community crisis accom network	Community networks mobilised	Networks	Community centred design
Disaster	Flood risk assessments	Emergency app				
Social	Scenario planning					
Information	Fire danger mapping	Fire danger index				Reflection and learning
Economic	Business planning		Alternative income		Assistance packages	
Ecological	Scenario planning		Management of other threats		Feral animal control	Reintroduction
Governance	Action on climate change			EMS coordination	Community Recovery Committee	
Infrastructure	Research	Overlays	Design criteria		Rapid assessment process	Rebuilding program

Stress

Anticipate

Avoid

Absorb

Respond

Recover

Renew

Time

Design

Develop a complexity perspective

Manage networks and connectivity

Develop governance that embraces change

Value, retain and build response and recovery capacity

Foster cohesion, self-organisation and local responsibility

Focus on slow variables, leverage & tipping points

Design for flexibility

Learn for change

(Applicable at the Personal, Community, Disaster and Systems level)

Define ◊ Orientate ◊ Design
